DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 and 2, drawn to polypeptide, classified in class 424, subclass 263.1.
 - II. Claims 3 and 4, drawn to nucleic acid, classified in class 536, subclass 23.1.
 - III. Claim 5, drawn to antibody, classified in class 424, subclass 139.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are drawn to patentably distinct structures. Invention I is drawn to amino acid sequences, Invention II is drawn to nucleic acid sequences, and Invention III is drawn to antibody.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification, and because while the searches may overlap, the searches are not coextensive, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
